01 PROFILE

I enjoy turning technical constraints into tools and experiences people can use. My work combines creative collaboration, full-stack implementation and hands-on responsibility for production systems.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client software from requirements through interfaces, APIs, data, delivery and ongoing support.

Work with specialists and client teams to connect application behavior with the systems behind it.

Full Stack Engineer (long-term client) · NuPrice, through Technomancy IT | 2019–2021

Built and operated marketplace-data workflows, repricing rules, accounts, subscriptions and billing.

Owned application support and technical operations across a sustained client engagement.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Set up hosted web services, developed in PHP and JavaScript, and handled billing-system development and replacement.

Combined software work with NOC leadership, engineering escalations, Docker and production recovery.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected CRM, provisioning, onboarding and service operations through centralized applications.

Worked with the CEO and CIO to turn cross-location business handoffs into shared workflows.

03 SELECTED WORK

ProofMark | Explicit workflow state across the stack · Completed client engineering contribution

Connected signing, identity, document fields, routing and audit history in a completed client contribution.

Built React/Next.js, API and PostgreSQL workflows with explicit state and fallback paths.

Kerf | Clear contracts for evolving interfaces · Own framework, early development

Built an early TypeScript/TSX framework with its own compiler, UI tools, routing and data layer.

Develop reusable contracts and actionable diagnostics for people and coding agents.

Technomancy platform | Connected operations and recovery · Own practice and client-operations product

Connected support, customer records, billing and infrastructure telemetry through tenant-aware services.

Delivery tooling records release identity and health; separate tooling verifies PostgreSQL restores.

04 CAPABILITIES

TypeScript / React / Node.js / PHP and JavaScript · Reusable interfaces / APIs / relational data / compiler diagnostics · Workflow state / identity / diagnostic tooling / reusable data contracts · AWS / Docker / hosted services / production recovery
